

I am writing to request that NAB's petition 04-160 be rejected. XM radio has had multiple positive effects on my life and I do not believe that there is any need to restrict their offerings. My brother is a truck driver who routinely uses the Weather and Traffic offerings of XM Radio to help him plan his driving time. He would undoubtedly write, but like many subscribers of XM radio, he is on the road a bulk of his time. XM provides him with a variety of entertainment and information that would be hard for him to find while driving from area to area. I personally use the weather and traffic when I am traveling to help me plan arrival and departure times from major cities. I do not see the value of restricting the content that XM radio is allowed to put forth. In the market place, it is appropriate for people's wishes and wants to drive the methods and varieties of services that are offered, I do not believe that lobbying should be allowed to bypass the peoples wishes.

Thank you

Mark Henderson
